

DIGITAL SAT · READING, WRITING & MATH

The whole SAT prep, on one live platform.

Live online classes, an exam that feels exactly like the real Bluebook test, and a question bank deep enough to never run out — all built around one goal: your score.

Ways to learn with us

WHAT EVERY STUDENT GETS

One login. Everything you need to **walk in ready.**

The student dashboard is where prep actually happens — practice, take real mocks, see exactly where you stand, and talk to your tutor.

Real Bluebook-style exam

A full-screen, timed, proctored interface that mirrors the official Digital SAT — so test day feels like practice.

Adaptive full-length mocks

Module 1 sets your baseline, Module 2 adapts to your level — then you get a real, scaled 400–1600 score.

6,800+ question bank

Math and Reading & Writing, tagged by topic and Easy / Medium / Hard — practice never repeats itself.

Score tracker

Every attempt plotted on the 400–1600 scale so students and parents watch progress build over time.

Deep analytics

Accuracy by topic and difficulty, timing per question, strengths and weak spots — no guessing what to fix next.

Build your own practice

Pick a topic, difficulty and length and generate a custom set in seconds — or drill exactly what your tutor assigned.

Video + text explanations

Every question comes with a clear worked solution in both video and text — understand the why, not just the answer.

Retest & review

Redo the questions you missed, revisit completed tests, and turn every mistake into a point you keep.

Messages & announcements

Reach your tutor, ask doubts, and get class updates and reminders — right inside the dashboard.

Plus a personalized study plan, full attempt history, secure profile & enrolment, and free diagnostic, mock & practice tests to start with zero risk.

HOW THE PREP WORKS

A clear path from diagnostic to test day.

STEP 01

Diagnostic

A free full mock pinpoints your starting score and gaps.

STEP 02

Live classes

Expert-led online sessions build concepts and strategy.

STEP 03

Targeted practice

Assigned sheets & custom drills on your weak areas.

STEP 04

Adaptive mocks

Real, scaled 400–1600 tests under exam conditions.

STEP 05

Review & retest

Analytics guide the next round until the score sticks.

Adaptive, exactly like the real Digital SAT

Each section runs in two modules. How the first module goes decides whether the second serves easier or harder questions — and the final score is scaled the same way the College Board does it. Students practise the real format, not a copy of the old paper test.

400–1600

THE ENGINE BEHIND EVERY STUDENT

A full teaching cockpit for tutors & admins.

Everything a student sees is created, assigned and tracked here. This is what lets us teach at scale and still give each student a personal plan.

Question-bank manager

Upload, edit and organize 6,800+ questions with LaTeX math, figures and difficulty tags.

Test & sheet builder

Create mocks, module tests and practice sheets, then edit any question inline per student.

Assign to students or batches

Push any test to one student or a whole group with a couple of clicks.

Per-student analysis

Attempts, progress, timing and observation notes for every learner in one profile.

Comparison & rankings

See how students stack up, spot who needs attention, and celebrate top movers.

Master dashboard

All students, tests and live activity in a single command view.

Communication hub

Message students, broadcast announcements and keep everyone on schedule.

Courses & payments

Manage enrolments, course access and payment records end-to-end.

Quality control

Bug reports and flagged-question workflows keep the bank accurate and trusted.

OUR PROGRAMS

Choose your **path to your target score.**

Every option is 100% online and includes full access to the platform — practice, mocks, analytics and explanations.

LIVE BOOTCAMP

Short, intensive prep for students with a test date coming up fast.

\$500 one-time

- ✓ Live, expert-led group classes
- ✓ Full platform & question bank
- ✓ Adaptive full-length mocks
- ✓ Progress tracking & analytics
